

BLF-FC, ALF-F

AUTO-LIFT FRYERS

BLF-FC

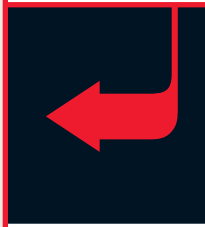

Optional microprocessor offers advanced control technology that enhances cooking capabilities

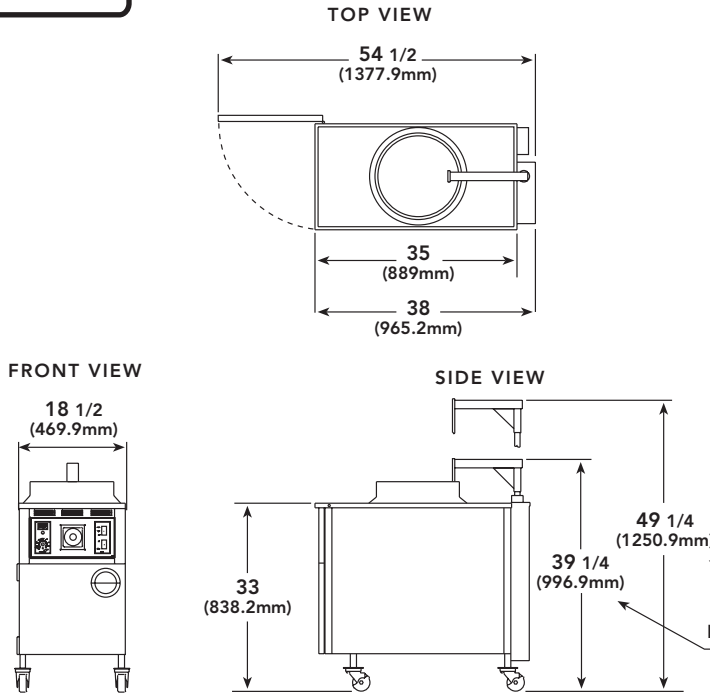

ALF-F

Patented "Quick-Disconnect" filter assembly ensures proper filter alignment

Easily implement and manage your fried food program with BKI's Auto-Lift Fryers. Load the food, set the fryer with the temperature control or optional microprocessor control and within minutes, a basket full of juicy, delicious food automatically rises and is ready to be served. BKI's patented "Quick-Disconnect" filtration system helps ensure a simple and easy filter assembly removal process.
